ANNOUNCER: "You're listening to LCN Radio, your number one source for LEGO City news! It's 6:00 PM, and time for your daily news update. I'm your host, John Brickston."

[SOUND EFFECT: NEWSROOM BACKGROUND]

JOHN: "Good evening, LEGO City! We have breaking news coming in from the heart of our bustling metropolis. A fire has erupted in one of the city's prominent buildings, sending a plume of smoke and flames high into the sky. Our reporter, Jane Studwell, is on the scene to give us live updates. Jane, what can you tell us about the situation?"

[SOUND EFFECT: SIRENS, FIRE CRACKLING]

JANE: "Thank you, John. I'm standing just a few blocks away from the burning building, which has been identified as the 'Glass Tower' – a 50-story office complex located in downtown LEGO City. Firefighters have been working tirelessly to extinguish the blaze, which appears to have started on the 35th floor."

JOHN: "Jane, do we have any information on what may have caused the fire?"

JANE: "Authorities are still investigating the cause, John. However, preliminary reports suggest that a malfunctioning coffee machine in one of the offices may be to blame. The building's fire alarm system activated promptly, and employees evacuated the building swiftly."

JOHN: "That's good to hear, Jane. What about the surrounding buildings and businesses in the area? Have they been affected?"

JANE: "The LEGO City Fire Department has set up a perimeter around the Glass Tower to ensure the safety of neighboring structures and residents. So far, no other buildings have been impacted by the fire. Authorities have requested people to avoid the area while emergency services continue their operations."

JOHN: "Thank you for the update, Jane. We'll check back with you as the story develops. In the meantime, our thoughts are with the first responders and everyone affected by this fire."

[OUTRO MUSIC]

ANNOUNCER: "Stay tuned to LCN Radio for further updates on the Glass Tower fire and all your LEGO City news. Up next, we have a special report on the grand opening of LEGO City's newest amusement park – BrickWorld Adventure! Don't miss it!
